

Willie

What a refreshing young stud! At WMCC, we attempt to bring you rare finds that today's industry can use as an alternative, from both a genotypical & phenotypical standpoint.

That being said, we have found "THE ONE"! Softy exhibits that desired capacity, fleshing ability, & muscle shape we admire in the OCC influenced cattle. Yet, he displays the most tremendous bone & foot size, sweet front 1/3, & hair unequalled by ANY Angus sire!

*Big Softy is a rare specimen that truly puts everything together in an unparalleled package of phenotype, economically important traits, & an exciting pedigree. This bull will undoubtedly make his mark on the industry as a calving ease sire with unequalled mass and style that any commercial cattleman, seedstock breeder, or show cattle producer can use and admire!
Not to mention, a gentle disposition you are sure to appreciate.*
